Experience

Amber

Product Manager, AI & Automation

Pune, India

Sep 2022 – Present

- **Architected AI Support Agent** – Automated 30% of customer queries across chat channels, enabling support team to prioritize on complex queries requiring judgement
 - Built end-to-end query processing pipeline transforming natural language inputs into structured parameters for targeted API tool calls, enabling accurate property information retrieval based on extracted user preferences
 - Implemented response guardrails restricting AI outputs to verified tool call data, preventing unauthorized information disclosure and hallucinations
 - Designed seamless human agent handoff protocols for queries beyond AI capabilities or when data was insufficient or cases where customer showed urgency/frustration in the conversation
- **Unified Cross-Channel Communication Visibility** — Consolidated customer interactions across multiple touchpoints
 - Led migration from standard WhatsApp Business to WhatsApp Business API via Chatwoot platform, providing managers visibility into previously siloed customer conversations
 - Integrated website chat, email, voice call transcripts, WhatsApp chats into a unified view on CRM lead page for complete interaction history enabling response time tracking for improved accountability
 - Delivered 20% CSAT improvement through enhanced visibility enabling better escalation workflows
- **Led transition of voice channel from Twilio to Plivo**, reducing operational costs by 20% while enabling direct inbound calls from Indian customers
- **Built Multiple Cross-Functional Workflow Systems** — Designed bidirectional data synchronization between enterprise platforms (Zendesk, LeadSquared, proprietary CRM) with robust validation frameworks ensuring consistent information across all customer touchpoints

Amazon

Program Manager, Workforce Intelligence

Hyderabad, India

Jun 2021 – Jun 2022

- **Developed advanced forecasting solutions** — Created time-series models predicting headcount needs across 8 support teams in U.S. middle mile logistics, while quantifying technology ROI through targeted pilots to determine feasibility of enterprise initiatives
- **Led strategic capacity planning** — Orchestrated cross-functional resource allocation for peak holiday season (Black Friday/Cyber Monday), ensuring SLA compliance across all logistics support functions

GRSE
